EDUCATION

University of Pennsylvania

Master of Science in Data Science & AI — Philadelphia, PA | Expected Graduation: December 2027

Brown University

Bachelor of Science in Computer Science-Economics (GPA: 4.0/4.0) — Providence, RI | Graduation: May 2025

Skills: Python, SQL, pandas, NumPy, scikit-learn, SciPy, NLTK, Java, JavaScript, TypeScript, HTML/CSS, Git, Excel, Figma

Relevant Coursework: Penn: Modern Data Mining, Applied Machine Learning, Statistics for Data Science, Algorithms for Big Data; **Brown**: Data Science, Mathematical Econometrics, Statistical Inference, Data Structures & Algorithms, Interaction Design

PROGRAMMING PROJECTS

Snowball*: League of Legends Performance Analytics | Python, pandas, scikit-learn, Riot Games API, Chart.js*

- Built a scalable ETL pipeline on the Riot Match and Timeline APIs that engineers 8 game-state features, including per-minute gold, XP and CS leads, then trained logistic regression and random forest win-prediction models with 5-fold time-series cross-validation to prevent data leakage, identifying XP lead as the strongest early-game predictor
- Ran a cohort analysis showing held leads won 89% of games vs. 42% after 2+ deaths while ahead, and built a dashboard with a replay feature that uses time-series event detection to flag each new game's costliest moment

Sneaker Bargains: *Sneaker Price Comparison Platform | Team of 4, React, TypeScript, Java, Firebase*

- Built a full-stack sneaker price comparison platform that aggregates live resale listings from a third-party product API, letting users search any shoe, filter by platform and compare price ranges side by side
- Engineered a Java REST backend (Spark) with a Guava caching proxy layer to cut repeat API calls, plus Google sign-in and a saved wishlist with Firebase; shipped with keyboard accessibility, ~40 frontend tests and backend JUnit suites

Search: *Wiki Search Engine | Python, NLTK, pytest*

- Built a Python search engine that parses and indexes 870+ XML wiki pages, processing text with NLTK tokenization and stemming, scoring relevance with TF-IDF and ranking pages with a from-scratch PageRank implementation iterated to convergence

Personal Portfolio: *Responsive Portfolio Website | HTML, CSS, JavaScript, GitHub Pages*

- Designed and built a responsive, accessible portfolio site from scratch with a reusable design system and shared case-study template, showcasing data science, product and UX projects, deployed on GitHub Pages

WORK EXPERIENCE & ACTIVITIES

Pointz, *Product Management Intern* — Providence, RI | 06/2023 - 08/2023

- Spearheaded the launch of the Pointz subreddit and designed a customer retention program with monthly challenges, boosting weekly retention in target cities and partnering with 5+ bike shops and cafes
- Led financial analysis for the PointzGPT feature, using customer interviews and Mixpanel data to optimize pricing and minimize costs, ensuring timely launch and breakeven
- Enhanced 15+ UI/UX components in Figma by conducting 20+ customer interviews, refining home screen icons and map interactions while designing the 'Group Leader Ride' feature for the Bentonville Moves Coalition

LEADERSHIP AND ENGAGEMENT

Data Science General Assembly, Executive Board Member — Philadelphia, PA | 09/2026 - Present

- Spearheaded planning and coordination of monthly department-wide events for 50+ students, fostering community engagement and networking among graduate students
- Selected from students across the Data Science program to serve on the executive board, leading event logistics, venue coordination, and catering for department-wide gatherings

Brown Entrepreneurship Program, *DEI Committee Lead* — Providence, RI | 09/2021 - 05/2025

- Developed a mentorship program connecting 30+ students with Brown alumni through profile matching based on shared interests and experiences, fostering entrepreneurial projects and balanced committee roles
- Organized a speaker event with ecoText founders to promote entrepreneurship in underrepresented communities, managing a $1,200 budget for strategic travel planning and venue enhancements
- Redesigned the DEI page on the club's website, promoting our mission and core values of passion, openness, and unity

SKILLS AND INTERESTS

Extracurriculars: Club Basketball, Club Volleyball, Korean American Student Association

Interests: Fashion, Street Photography & Film, NBA 2K, Super Smash Bros, Halal Guys, LoL (#1 Akali in Korea)
